

To Sir or Madam:

I am deeply concerned and troubled at the recent attempts of the National Association of Broadcasters (NAB), to stop satellite radio, in particular XM Radio, from broadcasting locally oriented programming such as traffic and weather. The competition satellite radio brings to the marketplace can only improve the quality and content of both commercial and satellite radio.

I implore you to send a clear message to the NAB, that they will not be permitted to dictate the nature of programming that the American people may choose from.

Respectfully,  
Gary T. Morgan, Jr.
